

## Digital Point of Purchase Screen Unit

TKGEOMEDIA's Lollybop units are a huge success offering a stylish, fun method of displaying video images, audio and even your own user defined text message (see options).

Lollybops use a flash memory player so it has never been easier to display new media presentations. It is possible to create the presentations direct from your own digital camera, camcorder or computer.

Lollybops are available in a wide range of colours such as red, green, yellow, blue, orange or can be left clear.

Lollybops are internally illuminated to add dramatic effect and a selection of rail, shelf units and racks to attach to the mounting pole are available, so there is sure to be a Lollybop to fit your design and product.

### NEW! Lollybop Mobile

Powered by a rechargeable battery giving in excess of 12 hours non stop play.

Lollybop mobiles are easily wheeled into position and require no external cabling or power supply leaving the Lollybop Mobile totally free-standing. A battery charger is supplied with each unit.
